Send

Send faxes from Microsoft Office, any application, any email, any Internet browser, and any Sharp OSA-enabled MFP integrated with GoldFax.

Send faxes securely without printing directly from Windows Office or other desktop applications, any email system, or any Internet browser (PC or Mac). Print to GoldFax and provide fax number.

Walk up faxing - Fax paper documents from Sharp OSA MFPs. Select GoldFax from the MFP touch screen, enter a fax number, and press Scan and Fax. **No MFP Fax Expansion Kit or MFP dedicated fax phone line** is required.

Automate

Automate sending of faxes from your production applications. GoldFax can fax-enable any software application.

Automate faxing of critical business documents

(Purchase Orders, Invoices, Confirmations, etc.) from your financial, ERP, CRM, ECM, Document Management systems like Oracle™, SAP™, Crystal Reports®, Microsoft Dynamics™, Sage™, etc. GoldFax will lower your costs and improve your business processes. No more printing and manual faxing.

Receive

Receive faxes in email, GoldFax Inboxes, secure network folders, or on network printers.

Automated routing of inbound faxes. If your telephone system supports Direct Inward Dial or if you use GoldFax Cloud Fax Telephone Service, you can have low cost (average \$.50/month), personal and confidential fax numbers for key people. GoldFax routes faxes directly to individuals or group mailboxes giving you complete distribution control and security.

SHARP

Archive

Automatically archive all received and sent faxes into the new GoldFax Insight Archive Search Retrieve option, network folders, or into any document or content management system.

Solutions

Easy to Install and Use. Low resource usage. Low ongoing cost.

GoldFax integrates with any tel system - analog, digital T1/PRI, Voice over IP. **AVAYA**, **CISCO**, **MITEL**, **ShoreTel**, **Microsoft Lync 2013**

GoldFax software installs on a Windows server and works with on premise Dialogic boards, fax appliance or Fax Over IP software, hosted GoldFax server, or with GoldFax Cloud Fax Telephone Service.

GoldFax is built on **Microsoft's .NET** technology, runs on a Windows server, is Citrix "friendly", works with Terminal Services, and runs in any virtual machine environment.

Security

Flexible User ID / password protection (PC and MFPs) including card reader and new "Single Sign-on" support on Sharp MFPs with 3rd party authentication including PaperCut. **PaperCut**
